## COVID-19 UPDATE: NOVEMBER 12, 2020

Epidemiologic Week 46: 11/8/2020 - 11/14/2020

This report is based on only available data; not all results have been received.

San Benito County (SBC) Public Health Services continues to work with medical providers to identify and test individuals who meet criteria for COVID-19 testing. As of November 12, 2020, twenty-three new cases have been reported, for a total of 1,563 confirmed cases of COVID-19 in SBC. Confirmed cases include patients who have since recovered and those who are deceased. Fifty-three percent (827) of positive cases reported were female; ages ranged from 26 days to 101 years (median: 36 years).

All results included in this update are current to November 12, 2020 at 2:30PM.

| Total            | Active | Recovered                          | Deaths |
|------------------|--------|------------------------------------|--------|
| 1,563            | 73     | 1,475                              | 15     |
| Negative Results |        | COVID-19 Required Hospitalizations |        |
| 15,964           |        | 83                                 |        |

| SBC Cases Likely Source of Exposure |       |
|-------------------------------------|-------|
| Classification                      | Cases |
| Travel-related                      | 43    |
| Community Transmission              | 495   |
| Person-to-Person                    | 961   |
| Under Investigation                 | 64    |

**Community transmission** occurs when the source of infection is unknown.

**Person-to-person transmission** occurs when infection is spread through a confirmed contact. Person-to-person transmission typically occurs in close-contact environments, such as households or workplaces.
