COVID-19 UPDATE: JULY 13, 2021 Epidemiologic Week 28: 7/11/2021 - 7/17/2021

This report is based on only available data; not all results have been received.

COVID-19 Snapshot

Total Cases	Active	Recovered	Deaths
6,192	40	6,089	63
Hospitalizations	Negative Results	Fully Vaccinated	Partially Vaccinated
252	32,663	28,134	4,846

San Benito County (SBC) Public Health Services continues to work with medical providers to identify and test individuals who meet criteria for COVID-19 testing. Since July 9, 2021, twenty-five new cases have been reported, for a total of 6,192 confirmed cases of COVID-19 in SBC. Confirmed cases include patients who have since recovered and those who are deceased. Fifty-three percent (3,290) of positive cases reported were female; ages ranged from 15 days to 101 years (median: 35 years). All results included in this update are current to July 13, 2021 at 1:30PM.

COVID-19 UPDATE: JULY 13, 2021

This report is based on only available data; not all results have been received.

Variants

- **B.1.1.7** (Alpha) variants are associated with approximately 50% increased transmission, and likely with increased disease severity and risk of death. Appears to have minimal impact on the effectiveness of treatments with antibodies.
- **B.1.351** (Beta) variants are associated with approximately 50% increased transmission. May have moderately decreased response to antibody treatments.
- **B.1.427** and **B.1.429** (Epsilon) are associated with approximately 20% increased transmission. There is significantly reduced efficacy of some antibody treatments.
- **B.1.526** (Iota) is associated with significantly reduced efficacy of some antibody treatments.
- **P.1** (Gamma) variants may have moderately decreased response to some antibody treatments.
- **B.1.617.2** (Delta) variants are associated with increased transmission. May have moderately decreased response to antibody treatments.

Variants Identified in SBC

Variant	# Cases
B.1.1.7	8
B.1.351	2
B.1.427/B.1.429	11
B.1.526	1
P.1	1
B.1.617.2	9

Transmission

SBC Cases by Likely Source of Exposure

Classification	# Cases (%)
Travel-related	1%
Community Transmission	34%
Contact Transmission	65%

- **Travel-related transmission** occurs when a person travels outside of the locality to an area with widespread transmission.
- **Community transmission** occurs when the source of infection is unknown.
- **Contact transmission** occurs when infection is spread through a confirmed contact. Contact transmission typically occurs in close-contact environments, such as households or workplaces.

Contact Transmission in SBC

- Contact: Household (Same Residence)
- Contact: Workplace
- Contact: Close-Contact (Different Residence; i.e. friend/relative)

Cases by City/Zip Code and County

City	Cases	Population	Rate *
Hollister	5,842	40,762	14.3
San Juan Bautista	220	2,140	11.5
Remaining	105	19,584	0.5

*City rate is cumulative and per 100 population.

County	Cases	Population	Rate *
San Benito	6,192	64,022	7.4
Santa Clara	120,192	1,967,585	2.7
Monterey	44,073	448,732	1.2
Merced	32,513	287,420	2.9

*County rate is a rolling 7-day average and per 100K population.
