## COVID-19 UPDATE: SEPTEMBER 14, 2021

### Epidemiologic Week 37: 9/12/2021 - 9/18/2021

This report is based on only available data; not all results have been received.

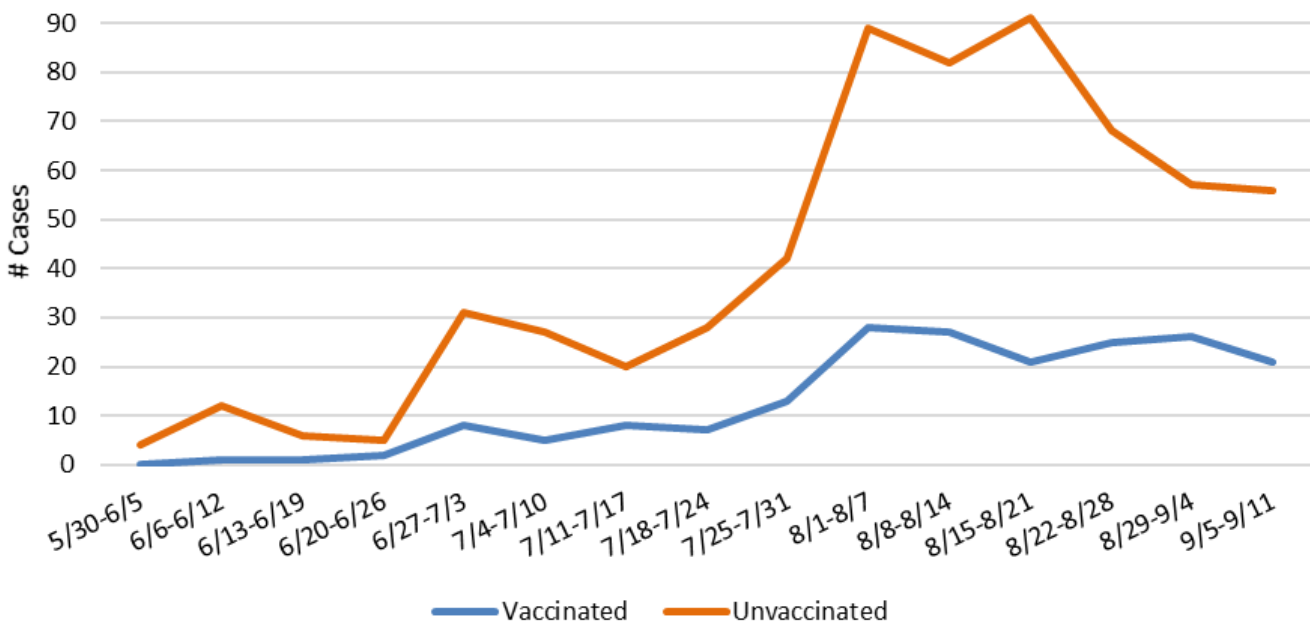

## COVID-19 Snapshot

Total Cases	Active	Recovered	Deaths
<b>6,914</b>	<b>102</b>	<b>6,745</b>	<b>67</b>
Hospitalizations	Negative Results	Fully Vaccinated	Partially Vaccinated
<b>292</b>	<b>36,775</b>	<b>33,061</b>	<b>5,375</b>

San Benito County Public Health Services continues to work with medical providers to identify and test individuals who meet criteria for COVID-19 testing. Since September 9, 2021, sixty-six new cases have been reported, for a total of 6,914 confirmed cases of COVID-19 in SBC. Confirmed cases include patients who have since recovered and those who are deceased. The most recent deaths were both unvaccinated individuals, ages 59 and 42 years, with four and two pre-existing conditions, respectively. Fifty-three percent (3,643 of positive cases reported) were female; ages ranged from 15 days to 101 years (median: 35 years). All results included in this update are current to September 14, 2021 at 3:30PM.

## COVID-19 UPDATE: SEPTEMBER 14, 2021

This report is based on only available data; not all results have been received.

### Variants

- **B.1.1.7** (Alpha) variants are associated with approximately 50% increased transmission, and likely with increased disease severity and risk of death. Appears to have minimal impact on the effectiveness of treatments with antibodies.
- **B.1.351** (Beta) variants are associated with approximately 50% increased transmission. May have moderately decreased response to antibody treatments.
- **B.1.427** and **B.1.429** (Epsilon) are associated with approximately 20% increased transmission. There is significantly reduced efficacy of some antibody treatments.
- **B.1.526** (Iota) is associated with significantly reduced efficacy of some antibody treatments.
- **P.1** (Gamma) variants may have moderately decreased response to some antibody treatments.
- **B.1.617.2** (Delta) variants are associated with increased transmission. May have moderately decreased response to antibody treatments.

#### Variants Identified in SBC

Variant	# Cases
B.1.1.7	8
B.1.351	3
B.1.427/B.1.429	12
B.1.526	1
P.1	2
B.1.617.2	77

### Transmission

Cases by Likely Source of Exposure	
Classification	# Cases (%)
Travel-related	1%
Community Transmission	34%
Contact Transmission	64%

- **Travel-related transmission** occurs when a person travels outside of the locality to an area with widespread transmission.
- **Community transmission** occurs when the source of infection is unknown.
- **Contact transmission** occurs when infection is spread through a confirmed contact. Contact transmission typically occurs in close-contact environments, such as households or workplaces.

### Contact Transmission in SBC

- Contact: Household (Same Residence)
- Contact: Workplace
- Contact: Close-Contact (Different Residence; i.e. friend/relative)

### Cases by City/Zip Code and County

City	Cases	Population
Hollister	6,503	40,762
San Juan Bautista	280	2,140
Remaining	131	19,584

County	Cases	Population	Rate *
San Benito	6,914	64,022	12.9
Santa Clara	138,867	1,967,585	12.3
Monterey	47,413	448,732	8.6
Merced	38,149	287,420	34.4

\*County rate is a rolling 7-day average and per 100K population.
